EUROPEAN CONFERENCE ON
HARMONISATION OF PhD PROGRAMMES
IN MEDICINE AND HEALTH SCIENCES
*University of Zagreb – Medical School

The Declaration of the European Conference on Harmonisation of PhD Programmes in Medicine and Health Sciences

Convened in Zagreb on April 24 – 25, 2004

(hereafter referred to as the «Zagreb Declaration»)

After extensive discussion and exchange of ideas and experiences among participants coming from 25 universities and from 16 European countries having different schemes for obtaining PhD degree in medicine and health sciences regarding both, form and the way of evaluation, ranging from monograph and evaluation within the same university to high standards of PhD thesis containing four or more papers published in internationally recognized peer reviewed journals, often with high impact factor and the inclusion of evaluators from abroad, the participants of the European Conference on Harmonisation of PhD Programmes in Medicine and Health Sciences (hereafter referred to as the «Zagreb Conference» or the «Conference») have agreed on the following:

Article 1

PhD programme is intended to enable individuals, after completing and defending their PhD thesis, to carry out independent, original and scientifically significant research and critically evaluate work done by others. To assure the above, the participants of the Conference reached consensus on the following:

Article 2

As in any kind of scientific peer review process, the reviewers of PhD thesis should be competent and independent from the PhD thesis, candidates and supervisor. In this sense, the participants of the Conference would like to encourage the inclusion of reviewers from other universities and countries.

Article 3

The Conference agreed that a suitable benchmark to describe the necessary achievement is a PhD thesis based on original *in extenso* publications in internationally recognized scientific-medical journals. The independent contribution of the candidate should be clearly demonstrated (for example the candidate being the first author). The Conference recommends that the minimal requirement for the PhD thesis in medicine and health sciences should be the equivalent of at least three *in extenso* papers published in internationally recognized journals. In addition to the papers presented the candidate should provide a full review of the literature relevant to the themes in the papers, and, where necessary, a fuller account of the research methods and results. Where the PhD research is presented in other formats, such as the single monograph, reviewers should demonstrate that the contribution is at least equivalent to this benchmark, and should encourage inclusion of publication from the research.

Article 4

While the main demonstration of the achievement should be the thesis and published papers, PhD programmes should include theoretical basis as well as development of technical research skills in taught courses where appropriate.

Article 5

The Conference recommends to all universities to make their PhD programmes publicly available to students, lecturers and tutors from other universities and countries. All medical schools are recommended to create their web pages and written material about PhD programmes in English and to make their programs open to candidates from other universities and countries. The Conference encourages the development of joint PhD programmes in order to enhance the link between the European Higher Education Area and the European Research Area with a view to ensure higher quality and enable joint degree recognition.

Article 6

The development of well-designed and high-quality PhD programmes requires substantial support by medical faculties, universities, national governments, the European Commission or private sponsors and other institutions in order to engage the best medical students into scientific research so as not to lose our future in medicine and public health.

The Zagreb Declaration was adopted unanimously on April 25, 2004 at 2:00 P.M. by:
